of which soft bullet	0	0	0	0	0	0	0

3.4 Interest rate and currency risks

Interest rate risk		strategy, limits, counterparties etc (if applicable)	
	<p>The Notes issued under the Programme may be Fixed Rate Notes, Floating Rate Notes, Index Linked Notes or Zero Coupon Notes. Each Series of Notes will be denominated in any Specified Currency and may be Dual Currency Notes (see "Terms and Conditions of the French law Notes").</p> <p>The proceeds from the issuance of the Notes under the Programme will be used by the Issuer to fund Borrower Loans to be made available to the Borrowers under the Credit Facility. The terms and conditions regarding the calculation and the payment of principal and interest under a Borrower Loan shall mirror the equivalent terms and conditions of the Notes funding such Borrower Loan.</p> <p>The Issuer is therefore not exposed to any risk of an interest rate mismatch arising between the payments received on the Borrower Loans and the payments to be made under the Notes. As a consequence, in the absence of any Hedging Trigger Event the Issuer will have no obligation to hedge any interest rate risk.</p> <p>The determination of the interest rate of each Series of Notes, as specified in each applicable Final Terms, shall be made by the Issuer regardless of the interest rate conditions applicable, as the case may be, to such Collateral Security Assets. Before a Hedging Trigger Event occurs, the Borrowers retain any interest rate risk linked to the mismatch between the Collateral Security Assets and the Borrower Loan. Thus until the occurrence of such Hedging Trigger Event, the Borrowers will hedge this interest rate risks according to their usual and current strategies and practices.</p> <p>Furthermore, before a Hedging Trigger Event occurs, and in order to enhance investors' protection and reduce interest rate risk and maturity mismatch upon collateral enforcement, BPCE shall comply with the hedging management guidelines (as described in "The Hedging Letter"). BPCE will ensure on each Asset Cover Test Date that:</p> <ol style="list-style-type: none"> 1. The amount of interest to be received under the Collateral Security Assets shall exceed the amount of interest to be paid under the Notes; and 2. The difference between the weighted average life of the Collateral Security Assets and the weighted average life of the outstanding Notes shall not exceed 2 years. 		
	Nominal	WAL	
Internal			
External			
Currency risk			
	<p>The Borrower Loan and the Notes funding such Borrower Loan may be denominated in different currencies. In order to hedge the risk resulting from that currency mismatch, under the Hedging Approved From Letter, BPCE SFH has undertaken, and BPCE (acting in capacity as Administrative Agent and Management and Recovery Agent), has acknowledged and agreed, that if, on any proposed Utilisation Date, the relevant Borrower Loans and the corresponding Notes are denominated in different currencies, BPCE SFH shall enter into the necessary currency hedging transaction(s) with an Eligible Hedging Provider, on or before the issuance of the relevant Notes and granting of the relevant Borrower Loan (the Pre-Enforcement Currency Hedging Transaction(s)). Pursuant to the Credit Facility and Collateral Framework Agreement, BPCE SFH has undertaken in favour of the Borrowers to use commercially reasonable efforts for that purpose, provided that if BPCE SFH does not find any such Eligible Hedging Provider agreeing to enter into such Pre-Enforcement Currency Hedging Transaction(s), the corresponding Notes shall not be issued and the relevant Borrower Loan shall not be made available by BPCE SFH to the relevant Borrower.</p>

Group level information, senior unsecured ratings and covered bond issuer overview

1.2 Ratings of the parent company of the group in which the CB issuer is consolidated.

1.3 Covered bond issuer ratings

The rating agencies' methodologies usually take the senior unsecured rating of a covered bond issuer's parent company as a starting point for their assessment of the credit risk of covered bonds. However, instead of referring to the parent company rating, some rating agencies may issue a "covered bond issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecured basis. Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB issuer's parent company although it may be different in some specific cases. If no "CB issuer rating" has been granted to the CB issuer, "NA" should be indicated.

2.1 Covered bond issuer

2.2 Covered bonds and cover pool

Guaranteed loans or mortgage promissory notes :

If the eligible assets are transferred into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans.

Asset backed securities :

If eligible asset backed securities are included in the cover pool, the explanations to the reporting should specify whether the information is provided using a look through approach (i.e. underlying assets) or if the outstanding amount of ABS securities held is indicated.

"Of which assets eligible to CB refinancing" :

The outstanding amount of eligible assets including replacement assets shall be filled in. The eligible amounts only take into account assets which fulfill the legal eligibility criteria to the cover pool. For residential loans, the eligible amounts are limited to 80% of the value of the pledged property for mortgage loans or of the financed property for guaranteed loans. The legal coverage ratio's weightings of eligible assets are not taken into account in this calculation (e.g. a loan guaranteed by an eligible guarantor with an LTV level below the 80% / 60% cap is entered for 100% of its outstanding amount regardless of the guarantor's rating).

2.3 Overcollateralisation ratios

Each issuer shall explain calculation methodology for each OC ratio :

- formulas
- all amounts shall be indicated after taking into account the cover pool's interest rate or currency swaps.
- accrued interest included or excluded ?

The legislation requires that the calculation of the legal coverage ratio be audited semi-annually within a period of three months following the calculation date. As a consequence, the current ratio is provisionnal / unaudited when the report is published. The last audited ratio is provided as an additional information.

Rating agencies : Minimum OC
 Issuers shall disclose the highest minimum OC requirement.

3 ALM

Contractual maturities :

Contractual maturities are calculated assuming a zero prepayment scenario on the cover pool assets. For pass through ABS, this assumption is applied to the underlying assets to determine the contractual maturity of the ABS (i.e. contractual maturity is not calculated according to the legal final maturity of the securities).

Expected maturities :

The assumptions underlying the calculation of the expected WAL and expected maturity breakdown shall be disclosed for each element of the cover pool including substitute assets. Some information should be provided to explain the prepayment assumptions on assets and liabilities. For substitute assets, it should be explained if these assumptions include asset sales or repo.

3.5 Liquid assets

Outstanding

The nominal value of liquid assets shall be reported.

Liquidity support

Provide details on the nature of liquidity support.

3.6 Substitution assets

Details of the information provided shall be given in the case of split ratings.

Residential cover pool data

- 4 Explain for each table which information is included or not included (e.g. external RMBS assets excluded)

The assets backing guaranteed loans (collateral directive framework), mortgage promissory notes and internal ABS shall be disclosed using a look through approach in each table.

4.2, 4.3 **Geographical distribution / regional breakdown**

The geographical breakdown of assets shall take into account the location of the pledged property for residential mortgages and the location of the property which is refinanced by the loan in the case of guaranteed loans. List can be extended by individual issuers where applicable

4.4 **Unindexed current LTV**

Unindexed LTV is calculated on the basis of the current outstanding amount of the loans and the initial valuation / price of the residential assets.

4.5 **Indexed current LTV**

Indexed LTV is calculated on the basis of the current outstanding amount of the loans to the appraised values or prices of the residential assets using an indexation methodology. Details of the indexation methodology shall be provided.

4.6 **Mortgages and guarantees**

Provide a breakdown by guarantee regime in the case of state guarantees

4.10 **Interest rate type**

"Floating" includes loans with with interest rate reset periods exceeding one year (e.g. loan indexed on CMS 5Y with an interest rate reset every five years)

"Mixed" shall be used for loans with a combination of fixed, capped or floating periods (e.g. 10 years initial fixed rate switching to floating).

Public sector cover pool data

- 5 Explain for each table which information is included or not included.
